

Hi Maziar, this is motor list . Please do the following : 1- give it to Ali, to put a new revision number and date etc. 2- Ali to check and see if it complies with P&ID and also with HAC. to make sure Zoning and no-zone are correct as per HAC report. 3- get Ali response and document and send to Payam to check them and compare with HAC report. If any issue he needs to discuss with Ali and come to final points. 4- get final files and comments which is approved by both Ali and Payam, you also check it and compare to HAC report to make sure it is correct. Once you all three are aligned , please send me final motors list along with any comments for further action. Thanks.
